

As historians we will:

Look at how transport has changed throughout history. We will study early travel looking at Viking Longboats and look at the history of cars, trains and

As scientists we will:

Learn about different materials and their uses. We will identify and classify their uses; compare the suitability of a variety of everyday materials; investigate changing the shape of solid objects and how this is used in recycling.

As athletes we will:

Develop our agility, balance, coordination and core strength through outdoor activities including using apparatus. We will be practising our long distance running ready for the Fun Run.

As citizens we will:

Develop our role as citizens in creating a happy school and creating our own class rules.

Year Group: 2

Travel and Transport

As ICT technicians we will:

Use technology to design a model of a train, bus or car. We will research old modes of transport and compare them with those that we use today.

As mathematicians we will:

Learn about number facts and the number system. We will be developing our counting skills making sure we can count in twos, threes, fives and tens. We will investigate the value of each digit in a two-digit number and represent these numbers in lots of different ways.

As writers and readers we will:

Read stories featuring a character created by Quentin Blake, Mrs Armitage. We will use Talk for Writing to invent our own story using different modes of transport. We will read many of Quentin Blake's stories and write a book review of our favourite story.

As designers we will:

Design, make and evaluate a set of wheels and axles. Have an understanding of where fruit and vegetables come from
